

# AB 1550, the Climate Investments for CA Communities Act: Increased Benefits for Senate District 27

SD 27 and the surrounding area already benefit from Greenhouse Gas Reduction Fund investments. AB 1550 takes the next step, *benefitting over 91,000 households in the district with incomes 80% of the state median or less.*

**In an affluent region, SD 27 has too much poverty:** Based on their incomes, roughly 91,000 households (28% of the district) would be eligible for benefits under AB 1550, *whether or not they live in designated Disadvantaged Communities.*

Available benefits include home weatherization, clean vehicle rebates, public transportation, affordable housing near transit, urban forestry, low-cost solar power and more.

## Already funded in SD 27

- \$7.3 million within the district
- \$9.7 million impacting the district
- Over 120,000 metric tons in greenhouse gas reductions

## SD 27 is disproportionately impacted by air pollution

SD 27 faces serious air pollution problems. Ventura County received a failing grade for ozone pollution in the American Lung Association's 2016 State of the Air report, while Los Angeles County received failing grades for ozone and particulate pollution.

## GGRF-funded projects in SD 27

The vast majority of GGRF benefits to the district came from the Clean Vehicle Rebate Project. Roughly \$7.2 million in rebates were issued to over 3,500 residents to replace highly polluting cars. CVRP promotes the adoption of clean vehicles by distributing up to \$6,500 in rebates for the purchase or lease of battery electric, plug-in hybrid and fuel cell vehicles.

SD 27 also benefited from the \$1.7 million Pacific Surfliner Transit Transfer Program grant. This grant will support seamless ticketing and transfer policies in the Los Angeles - San Diego - San Luis Obispo Rail Corridor.

Residents of SD 27 and the transit agencies that serve them also received financing to replace polluting vehicles through the hybrid and zero-emission truck and bus voucher program and the enhanced fleet modernization program. Some funding was also allocated to SD 27 for solar installation and weatherization for single-family homes.
